

## STEP ONE

To become a certified medical examiner, you must be licensed, certified or registered to perform medical examinations in accordance with applicable State laws and regulations, i.e. **MD, DO, DC, NP/ANP, or PA.**

## STEP TWO

**Create your National Registry Account** at <https://nationalregistry.fmcsa.dot.gov>. Once your registration is complete, you will receive a welcome message and a National Registry Number. You will need your National Registry Number to schedule and sit for the FMCSA medical examiner certification test in Step 4.

## STEP THREE

**Complete required training** from a training program that meets or exceeds the FMCSA's requirements, including (1) training must cover the 8 topics in the FMCSA's core curriculum specifications, and (2) the training provider must be accredited by a nationally-recognized medical profession organization that provides continuing education credits.

## STEP FOUR

**Register and Pass the FMCSA medical examiner certification test** administered by an FMCSA-authorized private-sector training organization. After the FMCSA confirms the test grading from the site and validates your credentials, they will issue you a National Registry Certificate and your contact information will then be listed on the National Registry Website.

## STEP FIVE

**Congratulations! You are now a Certified Medical Examiner.** As a certified medical examiner, you will make important medical certification decisions that will reduce the risk for crashes, injuries and fatalities among interstate CMV drivers.

## STEP SIX

**To maintain your listing on the National Registry,** you must transmit to the FMCSA your CMV Driver Medical Examination Results, submit to periodic random reviews, take a refresher course every 5 years, and re-certify by passing the FMCSA exam every 10 years.
